Original blue cloth gilt throughout. A few volumes have been neatly repaired and a few are in need of minor repair but the set is generally in fine condition, much nicer than most sets extant. From the library of Edward Stanley Gotch Robinson (1887-1976), Keeper of Coins at the British Museum until his retirement in 1952. Publication of this outstanding corpus began in 1873, mainly through the efforts of Reginald Stuart Poole, Keeper of the Coin Cabinet and author of several of the earlier volumes. The final volume, authored by Robinson, appeared in 1927. Intervening volumes were written by numismatic luminaries Barclay Vincent Head, Percy Gardner, Warwick Wroth and Sir George Francis Hill. The method of classification is based on the geographical arrangement conceived by Abbot Joseph Hilarius Eckhel (1737-1798) considered by many to be 'the father of ancient numismatics'. The earlier volumes were written strictly in catalogue form; later volumes, however, contain extensive historical data. The original edition has long been out of print and complete sets are now rare. The original autotype plates are immeasurably superior to the half-tone reprint plates. Certainly the most important standard reference on ancient Greek coins. 850.00

RECEIPT FOR MAKING AN OLLA PODRIDA

London, 29 September, 1843.

Dear Sir,

We have written to P for the receipt for making an Olla Podrida. It is generally composed of beef, mutton, chicken, bacon, sausage, red pepper, ham, cabbage, peas, carrots, turnips, and boiled up together, after the soup which is extracted from it. — *It is just eatable in the absence of anything else.*

To R. Santhill.

Jno. F

Yours faithfully,

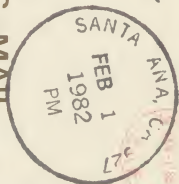

It will now be for my Readers to determine, how nearly my cookery has approached the above instructions, and its result.
